

▶ PARTS OPERATIONS

ABILITY DMS allows you to gain control over the most complex department in any Powersports dealership, PG&A. Our parts application is proven to increase efficiency, reduce overstocking, and maximize profit opportunities. You can:

- Manage stocking levels
- Utilize multiple pricing scenarios
- Identify dead stock or slow moving pieces
- Manage multiple inventories from different vendors
- Update price files from multiple vendors
- Interface with all major Electronic Parts Catalogs
- Submit electronic purchase orders to major OEM's and vendors
- Track customer purchase activity
- Implement bar coding for inventory
- Run inventory and productivity reports on demand
- Market to your customer base

▶ SERVICE OPERATIONS

The ABILITY DMS service module contains many features you just can't find in other Powersports DMS offerings. You and your service team can track every step of the repair process from reception to write up, repair, and close out. You can:

- Track technician time
- Ensure parts are correctly added to the RO
- Assign technicians by skill level
- Track jobs through the shop
- Build service kits for standard jobs
- Design flexible labor rates
- Create and track warranty claims
- Measure the productivity of each service employee
- Maintain a comprehensive history by customer and VIN
- Market to your customer base

OVERVIEW

Want a Dealer Management System that delivers solutions to your growing dealership? ABILITY DMS provides software designed to help you grow profits, improve productivity, and keep your customers coming back.

ABILITY DMS is powered by ADAM Systems, a company with over 30 years of experience working with dealerships to craft products that meet today's demanding Powersports retail environment. Our products enable you to manage each department of your operation with the most widely used and powerful computing platform on the planet, Microsoft Windows. No other Powersports DMS is as easy to learn, easy to use, as flexible, or as cost efficient as ABILITY DMS. Better still, unlike so many others, we don't require proprietary hardware, expensive networks, or long-term contracts.

MAJOR UNIT INVENTORY & SALES

ABILITY DMS is totally integrated with a complete suite of applications encompassing Parts Operations, Service Operations, CRM, Major Unit Inventory & Sales, F&I, Accounting, and Payroll. Each application shares data with the others eliminating the need to re-key the same information. All your data is protected with multiple levels of security throughout the system.

ABILITY DMS is backed by our own US based programmers and technical support staff ensuring that you can get timely answers to your questions.

Call or email us today, and see why so many dealers are turning to ABILITY DMS.

Keep track of your entire unit inventory with the ABILITY DMS major unit inventory and sales module. Streamline and speed up the sales process while ensuring accurate paperwork and billing. You can:

- Track accessory additions
- Set up and track OEM rebates and incentives
- Accurately calculate gross profit on each sale
- Automatically calculate sales commissions
- Print directly to pre-printed or laser forms
- Transmit tag and title applications to participating states
- Maintain a comprehensive history by customer and VIN
- Generate multiple reports on demand
- Market to your customer base

FINANCE & INSURANCE

Take advantage of the growing profit opportunities in F&I with the totally integrated ABILITY DMS F&I module. Use our built-in sales process to ensure you offer your customers a wide array of after-sale products designed to boost customer retention and your bottom line. With the ABILITY DMS F&I module you can:

- Accurately calculate finance and lease payments
- Print directly to pre-printed bank, warranty, and insurance forms
- Precisely calculate finance rate reserve, insurance, and warranty profits
- Electronically transmit credit applications thru RouteOne and DealerTrack
- Run multiple deal and payment scenarios side-by-side
- Speed the process through intelligent forms queuing
- Accurately calculate sales and management commissions
- Generate productivity and management reports on demand
- Maintain a comprehensive history by customer and VIN
- Market to your customer base

ACCOUNTING

No department of your dealership is as critical to your success as accounting. You need complete, accurate data at your fingertips so you can make the correct decision. The ABILITY DMS accounting module gives you the total dealership picture by:

- Sending all transactions to the General Ledger
- Integrating transaction data from each department
- Tracking transactions back to the source (drill down)
- Scheduling all OEM, bank, customer, and warranty receivables
- Maintaining up to the minute inventories
- Organizing financial data by department or profit center
- Instilling employee accountability
- Generating Daily Operating Control (DOC) reports
- Generating OEM financial statements
- Customize reporting
- Maintain a comprehensive transaction database
